## EXPERIENCE

### **Sifted (formerly VeriShip)** – *Software Engineer + Team Lead*

SEPTEMBER 2020 – PRESENT • KANSAS CITY, MO • REMOTE

- Automated and managed data ingestion processes for thousands of customers to ensure data availability from a wide variety of shipping carriers
- Ensured processes were migrated effectively during a company merger by leading efforts to consolidate common services and databases
- Enhanced data ingestion tooling - from AWS CDK scripts to npm packages

### **nbkc bank** – *Software Engineer + Squad Lead*

June 2018 – September 2020 • KANSAS CITY, MO • PARTIAL REMOTE

- Developed Angular applications that customers used everyday to apply for banking products along with services for day-to-day internal operations
- Built tooling that enabled us to collect insights on customer interactions

### **Spreetail** – *Full-Stack Engineer + Squad Lead*

May 2015 – May 2018 • Lincoln, NE • ONSITE

- Led a team of 3 to 5 developers while building internal tools to support the expansion of a rapidly growing marketplace ecommerce business
- Managed integrations that exchanged data with 3rd party marketplaces (eBay, Amazon, Walmart, and more)

### **Techapedia** – *Co-owner + Co-founder*

January 2011 – March 2016 • Overland Park, KS • REMOTE

- Provided technical services (from website design to computer repair to iPhone screen repair) for both individuals and businesses in the KC area

## TECHNICAL SKILLS

These are technologies I've used most in my past experiences, and they tend to be my preferred areas of focus. However, I love to learn, so I'm never afraid to take on challenges or talk about other skills not listed below.

JavaScript	C#	SQL
TypeScript	HTML / SCSS	Node.js
Angular	Webpack	Java
AWS/Azure/GCP	Python	Git

## EDUCATION

### **University of Nebraska – Lincoln**

**GPA: 3.844**

Jeffrey S. Raikes School of Computer Science and Management

Major: Computer Science      Minors: Math and Business Administration

Graduated with Distinction in May of 2016
